

Catch-Up

Day	Task	Details	Deadline
Day 1:	Integration	Fully integrate the frontend with backend APIs. Ensure that frontend routes are protected, and unauthenticated users cannot access restricted pages. All hardcoded features should be integrated with your backend	28 th March (Thursday)
Day 2:	Testing	Start testing backend units with Jest aiming for at least 80% coverage. Prioritize testing on authentication and CRUD operations for Skills, Works, and Blogs.	29 th March (Friday)
Day 3	Swagger Documentation	Document all backend routes using Swagger. Ensure that the documentation is clear and detailed for easy use by developers and for future reference.	30 th March (Saturday)
Day 4	Deployment	Deploy the entire system and ensure that all components are working as expected. Share deployment links in the output sheet and on Slack for review by the TTL and Manager.	30 th March (Saturday)

Notes:

Daily Check-ins: Short daily check-ins will be essential for monitoring progress, addressing blockers, and providing support where needed. Therefore, everyday we shall be having separate standup to show me your progress. It won't exceed 30 minutes everyday.

Final Demo: The final demo for the catchup shall be held on Sunday at 2pm with the TTL and Manager
